Billy Smith

Executive Director/CEO

The American Society of Plumbing Engineers (ASPE)

Phone: 847-296-0002, Ext. 222

bsmith@aspe.org

Billy Smith, FASPE, is the executive director/CEO of the American Society of Plumbing Engineers (ASPE). He is responsible for the administration, management, and financial operations of ASPE and implements policies and procedures established by the ASPE Board of Directors.

Billy provides professional administrative and management support and financial expertise to ASPE's local chapters and for all the organization's activities and programs. In addition, he represents the interests of ASPE and the plumbing engineering community in codes and standards activities and serves as a technical resource for ASPE staff and members.

Billy continues to build and maintain relationships with other industry organizations to ensure that the public's health and safety are kept at the forefront of legislation and regulations regarding plumbing system design, installation, inspection, and maintenance.

In 2014, he joined ASPE as senior director of technical and regulatory affairs, serving as main liaison with the plumbing industry's code-writing and standards-developing organizations.

In 1993, he joined ASPE as an affiliate member and is currently a full member. Billy accepted a leadership role in 2002 when he was appointed to the ASPE Board of Directors as society affiliate liaison, and during his tenure the position evolved into vice president, affiliate. He also served as chair of ASPE's Exhibitors Advisory Committee for several years. Billy was elected to ASPE's College of Fellows in 2012 and received ASPE's Distinguished Service Award that same year.

He has actively participated in the codes and standards development activities of other industry organizations, including the American Rainwater Catchment Systems Association, ASSE International, ASME International, ASTM International, CSA Group, the International Association of Plumbing and Mechanical Officials, International Code Council, and Plumbing and Drainage Institute.
