

Plumbing Manufacturers International Provides the Facts About Legionella and Water Supply Systems

"Just the Facts: Legionella and Water Supply Systems" is a new Plumbing Manufacturers International (PMI) publication and website content produced for those who may have questions about the threats posed by this waterborne pathogen. Produced by PMI with the assistance of nationally known Legionella experts, this content is available as a [web page](#) and [.pdf](#). Your organization is encouraged to link to this content from your website, social media messages, e-newsletter or blog.

The content takes a deep dive into the subject matter, with 27 different publications cited as references. The content can serve as a core document for organizations wishing to advocate for water system safety. In addition, to encourage participation and social media conversation and sharing, PMI has produced a toolkit including a [one-page summary](#), [social media messages](#) and [graphics](#), and a [quiz](#) you can link to from your website.

"PMI produced this publication to be true to its mission of 'Safe, Responsible Plumbing. Always,'" said Kerry Stackpole, PMI CEO/executive director. "Our past experiences with topics such as lead in plumbing, low flow rates, and water-efficient plumbing have informed our belief that PMI can make important contributions as a thought leader providing reliable and accurate information on issues pertaining to safe water and safe plumbing."
